

## **(1) Office of Strategy and Policy**

*(a)* The Office of Strategy and Policy (OSP), within the Office of the Administrator, provides analysis and other support to inform NASA's decision-making process, policy integration, and strategy implementation. OSP seeks to align Agency goals, policy, and strategy by maintaining awareness of critical emerging issues both internal and external to the Agency, engaging leadership as needed, and conducting analysis to support decision making.

*(b)* OSP supports NASA leadership by assessing changes in the internal and external environment, identifying the trade space for key Agency decisions, and performing studies and analyses to ensure timely, well-informed decisions. OSP areas of analytical focus include policy integration across the Agency, external partnerships, strategic planning, workforce/infrastructure alignment, major acquisition strategy, and environmental assessments.
